

PAY AS YOU GO EMPLOYEE CARE SERVICES

PAY AS YOU GO MAKES FINANCIAL SENSE FOR PURCHASING EMPLOYEE SERVICES

Here at the Red Poppy Company we have adopted a common sense approach to employee care, that enables your organisation whether small or large to purchase a range of services as and when you need them on a fee for service basis.

Thousands of organisations in the UK are purchasing expensive packages of care which will include telephone and face to face counselling, advice and legal lines on a costly contractual basis when the actual usage by employees is minimal.

Organisations are paying for these on call services 24 hours a day 7 days a week, which is simply unnecessary.

The benefits of using Red Poppy Services are:

-  Your organisation controls the budget and usage
-  A hands on personal service
-  Accessing services at point of need which is cost effective
-  There are no costly up front retainer fees
-  Red Poppy Company understand both the needs of the employee and employer
-  24/7 services are not required as they create a dependency culture for employees, diminishing self responsibility and discouraging self coping.
-  We focus on preventative training and building resilience in order to enhance Health and Wellbeing in the workplace.

Red Poppy Nationwide Fee for Services include:

-  Face to Face and telephone counselling 6 session model used
-  Preventative Training
-  Workplace coaching and mediation
-  Critical Incident response following an accident or incident
-  Experienced Critical incident responder to attend on site
-  Time limited out of hours crisis service when required
-  Telephone consultation and helpline to support staff and managers
-  Specialist trauma treatment service
